## EDUCATION

**Queens College, The City University of New York**

**Expected: Dec 2026**

*Bachelor of Science in Computer Science, **GPA: 3.60***

## RELEVANT COURSEWORK

- Machine Learning, Large Language Models, Data Structures & Algorithms, Linear Algebra, Probability & Statistics, Database Systems, Distributed Systems

## TECHNICAL SKILLS

- Programming:** Python, TypeScript, JavaScript, Java, C++
- AI/GenAI:** LLMs, RAG, Agentic AI, Multi-Agent Systems, Prompt Engineering, LangGraph, LlamaIndex, OpenAI API, Gemini API, Hugging Face, Embeddings, Semantic Search, RAGAS, Node.js, FastAPI, REST APIs, Auth, PostgreSQL, MySQL, MongoDB, SQL
- Backend & Data:** Node.js, FastAPI, REST APIs, Auth, PostgreSQL, MySQL, MongoDB, SQL
- DevOps & Tools:** Git, GitHub, Docker, GitHub Actions, Jupyter Notebook, VS Code, Postman

## PROJECTS

### SEC 10-K RAG — Evaluated Financial QA System | GitHub

**May 2026**

- Built a citation-grounded SEC 10-K RAG pipeline with structured HTML/XBRL parsing, OpenAI embeddings, ChromaDB, BM25, hybrid RRF retrieval, and cross-encoder reranking over Apple's 2025 annual report.
- Implemented a parallel LlamaIndex version to compare framework vs. from-scratch RAG design, reducing core pipeline code by 22% while achieving 0.74 Recall@1, 0.8032 MRR, and 0.9901 RAGAS faithfulness on a 50-question gold eval set.

### LaunchLab AI — Agentic Multi-LLM Product Studio | GitHub

**May 2026**

- Built a multi-LLM product studio using Next.js, Flask, Gemini, OpenAI, and LangGraph to convert rough product ideas into research, product blueprints, Claude Code build prompts, campaign copy, visual prompts, and evaluation reports.
- Implemented shared-state agent orchestration, provider fallbacks, structured error handling, and workflow visualization to compare manual pipelines against scalable LangGraph execution.

### Code Council - Multi-Agent AI System | GitHub

**Jan 2026**

- Designed a multi-agent system coordinating explanation, debugging, complexity analysis, and debate-style reasoning for code review.
- Built a React + TypeScript dashboard visualizing agent outputs and debate rounds for transparent LLM-assisted analysis.

## EXPERIENCE

### AI Agent Builder Intern, NeuralSeek

**April 2026 - Present**

*Remote*

- Built and refined AI agent workflows on NeuralSeek's platform, focusing on multi-step reasoning, automation, and output validation.
- Evaluated agent behavior across edge cases, identified failure points, and improved workflow reliability through testing and iteration.

### Academic Tutor, LaGuardia Community College

**Feb 2024 - Jun 2024**

*Long Island, NY*

- Mentored students 1-on-1 in C++ and algorithmic problem-solving, resulting in improved code debugging skills.
- Created structured notes and practice modules that helped students reduce coding errors and understand core CS concepts faster.

### Web Developer Intern, WebX Nepal

**Mar 2022 - Jul 2022**

*Kathmandu, Nepal*

- Developed responsive web pages using HTML, CSS, and JavaScript, enhancing website usability and cross-device performance.
- Collaborated with developers to transform client requirements into functional UI components and improve UX.
